How About You?

JAVE you planned to I I plant seed patches of winter legumes and small grains this fall? This is an important question. And it's an important job for every Alabama farm-

Every year thousands of Alabama farmers are forced to limit their acres planted to winter legumes and small grains because they are unable to buy seed, or else seed are not available. By producing their own seed farmers would not only save money but would be assured of having plenty of planting

seed when needed. If you want to be sure of having planting seed next year, make plans for a seed patch this fall.

How To Save

> One of the tragic things about sin is that a wicked act does not stand alone but leads into another sin to cover the first. In the case of Joseph's brethren, their sin against him was covered by deceit. They lied to the father and maintained that lie for years, even though they saw that their aged father was brokenhearted. How callous sin makes the heart of a man! Yet the very fact that they lied to cover their sin indicates that they had fallen so low. James Strahan well says: "Evil never dares to be

sincere. It always borrows the colors and wears the garb of innocence. It has a whole lifetime of hard labor in keeping up appearances. Hypocrisy is the tribute which all bad men have to pay to the ideal of goodness." III. God Overrules Evil for Good It was God's plan that Joseph

should come to his greatest usefulness in his place of authority in Egypt, so, He directed the sale of the young slave into the home of phar, a leading officer of

The story of Joseph's life in Potiphar's house is one of unusual nterest. Faithfulness to duty, loyalty to God and truth led to shifting xperiences of imprisonment and o favor, but ultimately he came out into the place of leadership in the overnment of Egypt. In this place

Since the matter of the relation before us these days, it will be well to note that Scripture holds a very exalted view of the public servant. Paul says we are to "be subject unto the higher powers. For there is no power but of God: the powers that are ordained, of God" (Rom. 13:1). The Bible clearly teaches that every governmental agency and every public servant, from the liceman on the beat to the President in the White House, is only perted to exercise authority over his nen because God has orned that there should be such ernment. Clear it is that every right-thinking official of state and nation should be humble, teachable discreet, and wise in the exercise of his power, and God-fearing in the discharge of his responsibility. Our lesson provides unusual oprtunity for the teaching of proper amily relationships, the right at titude toward government, as well as the blessed assurance and con

fidence which we may have who

DIVIDE YOUR DOLLAR

Your Neighbor

Everybody has a certain amount of civic pride—that sort of pride which helps make a village a town, and a town a metropolitan city.

The growth of any community is dependent upon the support given its citizens. If you fail in your cooperation, your whole town either stands still or goes back.

If you uphold your town by sustaining it wholeheartedly, you help yourself and the community. Buy at home! Be neighborly with your dol-

Divide your dollars among your merchants and others who have the interests of Elba at heart. Help them and they will help you to greater values-for increased volume means decreased costs.

Elba needs your support and you need the support of the town. Let's get together and share our dollars for a mutual prosperity.

> Your Electrical Appliances

Proper care now will help you get all the years of service that the manufacturer has built into your Electrical Appliances. A little oil, a minor adjustment or a small new part can keep Electric Servants running like new giving you full enjoyment from your appliances which must last the duration of the war.

HOW TO MAKE ELECTRICAL APPLIANCES LAST LONGER

Do not let the appliances overheat; turn off current when not in use.

Keep appliance cords dry and free from oil

When disconnecting appliances, never "jerk" the cord out of electric outlets. 4. Avoid knotting or kinking cords.

5. Oil motor driven appliances frequently. A drop or two makes a difference. Protect the rubber on the wringer of your

washing machine by relieving pressure on wringer rolls when not in use. Dump the collected dirt from the bag of your electric vacuum cleaner frequently.

Frequent defrosting of your electric refrigerator increases efficiency and lowers electric consumption.

Do not permit cooking foods to boil over on electric heating elements. Should this occur, clean immediately.
